

# ***MOSQUITO-BORNE DISEASES CHATBOT***

## **Team Members:**

1. P. Akshaya
2. M. Shivani
3. N. Sahithi
4. MG. Hima sree
5. N. Sandhya

## **1. Title**

AI Chatbot for Awareness of Mosquito-Borne Diseases

This chatbot helps create awareness about mosquito-borne diseases such as Dengue, Malaria, Chikungunya, and Zika, providing users with symptoms, prevention methods, first-aid guidance, and health tips. It acts like a digital health assistant to help people stay informed and safe.

## **2. Objective**

The objective of this project is to educate users about mosquito-borne illnesses and guide them with accurate information. The chatbot aims to:

1. Spread awareness about mosquito-borne diseases
2. Provide prevention and protection tips
3. Help users identify symptoms early
4. Give first-aid guidance
5. Support public health education in a simple and accessible way

## **3. Tools Used**

The chatbot “***Mosquito borne diseases***” was developed using Denser.ai, a no-code AI website and chatbot builder. It helped us:

- Design a responsive interface
- Build interactive conversations
- Customize automated responses
- Provide instant replies to user queries

## **4. Methodology**

**Day 1:** Finalized the topic and chatbot theme – mosquito borne diseases

**Day 2:** Collected information on mosquito-borne diseases

**Day 3:** Designed and built the chatbot using Denser.ai

**Day 4:** Tested the chatbot and prepared final presentation

## **5. Prompt**

*Create a chatbot for mosquito borne disease*

## **6. Output**

The output of the project is a user-friendly chatbot named Mosquito borne diseases. It provides:

- Disease information
- Symptoms
- Prevention methods
- First-aid support
- When to consult a doctor

## **7. Result**

The project successfully created an interactive mosquito-borne disease awareness chatbot. It helps users gain knowledge and adopt preventive measures to avoid infections caused by mosquitoes.

## **8. Conclusion**

The Mosquito borne disease chatbot is a useful digital awareness tool that spreads health education. It provides quick and reliable information, helping users stay safe and alert about mosquito-borne diseases.
